PCC Rail Authority
c/o Joe Poire, President
302 N. Mill Street
Colfax, WA 99111

Dear Joe:

With improved railroad transportation a reality, and with assurances of continued service, we should be able to increase shipments both to currently served sites and to locations where we will expand our capacity. My estimate, based upon projects currently in the hopper, is that we should be able to ship 75 more cars annually on the Marshall- Moscow line, 45 cars more annually on the Coulee City- Marshall branch and 400 cars more annually on the PV Hooper line. We've been a shipper on the line for more than half a century and would like to increase our shipments by train.

Sincerely,

Alex McGregor.
President
